## **KELLEIGH'S CAUSE - CURE AVMs**

At age 4, Kelleigh Gustafson was diagnosed with massive arteriovenous malformations (AVMs) affecting the right side of her head, neck and chest. This is a life-threatening condition and, in Kelleigh's case, it is inoperable. Simply put, it is a birth defect that causes abnormal blood vessel growth, which affects her brain, airway, gastrointestinal tract and heart. At this point, there is no cure.

Kelleigh's dream is to find a cure for all of the people affected by AVMs. Kelleigh's Cause is a fund set up through to support research to develop a new drug therapy to better treat or cure AVMs.

You can help Kelleigh with her cause and learn more about AVM by viewing the sites listed below, or contacting her at [kelleighscause@gmail.com](mailto:kelleighscause@gmail.com).
